

Tables

and Related Products

The new market

Sleek. Expressive. Fresh. Modern. Affordable. Customizable. These adjectives are commonly expressed when talking about the full-suite of Enwork tables and related products. Need technology? Got it. Want to carry common aesthetics throughout a space? No problem. Need it fast? Can do. Need a special quote in 24 hours? Done. Let's re-think and re-imagine solutions together.

Come in. Be inspired.

Video Sharing (VS) Tables. Turnkey integrated solutions.

These Video Sharing Tables are just what your project teams need to support collaboration and facilitate highly interactive meetings. Visually sharing data and information helps speed decision-making, increase alignment, and enhance understanding of complex challenges.

Video Sharing technology is simple to use. After connecting to your computer, simply press the button on the "Show Me" cable to take control of the display. It's fast and easy since no password or special software is required.

Concurrence VS Tables are designed as furniture, not rolling AV racks. Wires, cabling, and the technology are neatly hidden between panels and in the structural trough under the table top.

Choose what you need: 2, 4, or 6 HDMI or VGA "Show Me" cables; single or dual monitors; seated or standing height; storage; segmented trim. A wide variety of top shapes, sizes, edges and finishes are available to meet your requirements.

Simply place one order from one source without the need for an outside technology integrator. Decide on your table specifications, add the technology, and we can even include a Samsung commercial grade monitor. Plug it in and everything works. We've made it simple, and your teams will thank you.

Conference table power and data. Let us design a solution for you.

We make it easy to choose the right Power/Data assembly, assuring you have a highly functional yet cost effective solution. With a little bit of planning, connecting a table or a training room can be simple – usually without the added complexity and expense of a technology integrator. Listed below are planning tips to help assure an impressive, productive installation.

Step 1 – Determine the number of power outlets needed.

Based on the size of the table and type of space, determine how many users might need power.

Step 2 – Determine the number and type of datacom connections needed.

Which systems require physical connections? If the room or facility has a wireless network, fewer will be needed.

Training and Teaming Table power and data. We've got you covered.

CONTINUED FROM PREVIOUS PAGE

Step 3 – Determine which Power/Data unit best fits your requirements.

Use the Conference and Training/Teaming charts as well as the detailed descriptions in the Price List to compare capabilities and features.

Data Options – Each unit is marked with an ▲ or ● to identify the category of datacom options available.

Step 4 – Determine the location and orientation of the Power/Data units in the table top.

The position of units in a table affects both user access and the ease with which power and data can be routed into the table.

Step 5 – Don't forget to order accessories

Cable Grippers, Cable Managers, and other accessories help keep all the wires and cables organized and out of sight. Available options are shown on the next page.
