

# Healthy Interiors for HEALTHIER HOSPITALS

Most Three H products can meet the *Safer Chemicals Challenge* of the *Healthier Hospitals Healthy Interiors Goal version 2.0*.

Our customers can easily select options for their product preferences by using the clarifying suggestions below.

For additional information, please contact Customer Service at [customer.service@three-h.com](mailto:customer.service@three-h.com)

Furniture described herein meets the Healthy Interiors goal of the Safer Chemicals Challenge according to the manufacturer. Practice Greenhealth has not verified this information. Additional information regarding the Safer Chemicals Challenge may be found online at [www.HealthierHospitals.org](http://www.HealthierHospitals.org).

## Selection Guidance

Customer choice plays an important role in avoiding undesired chemicals and treatments. Furniture and options specified must meet all criteria below.

### 1 Formaldehyde

Three H furniture that is Indoor Advantage Gold certified qualifies. Certificates are publicly available at [www.three-h.com/environment.html](http://www.three-h.com/environment.html).

The certificates clarify any exceptions, such as the use of some veneer finishes or specific settings.

### 2 Perfluorinated Compounds (PFCs)

PFC-free fabrics are available. Customers must be responsible for Customer's Own Material (COM) fabric content.

### 3 Polyvinyl Chloride (PVC)

PVC edges make up less than 1% of the weight of a worksurface or table so could still be accepted in an HH project. Electrical components are exempt from HH guidance, but Three H offers a non-PVC option for electrical components that must be specifically ordered with an up-charge.

### 4 Antimicrobials

Antimicrobial-free fabrics are available. Customers must be responsible for the COM fabric content.

### 5 Flame Retardants

Some fabrics may contain flame retardants, so customers must select flame retardant free fabrics. Vinyl upholstery, some polyurethanes, and most high-performance textiles must be avoided. Customers must be responsible for COM fabric content.
